Override Lighting Control for Daylighting Systems

Override Lighting Control for Daylighting Systems

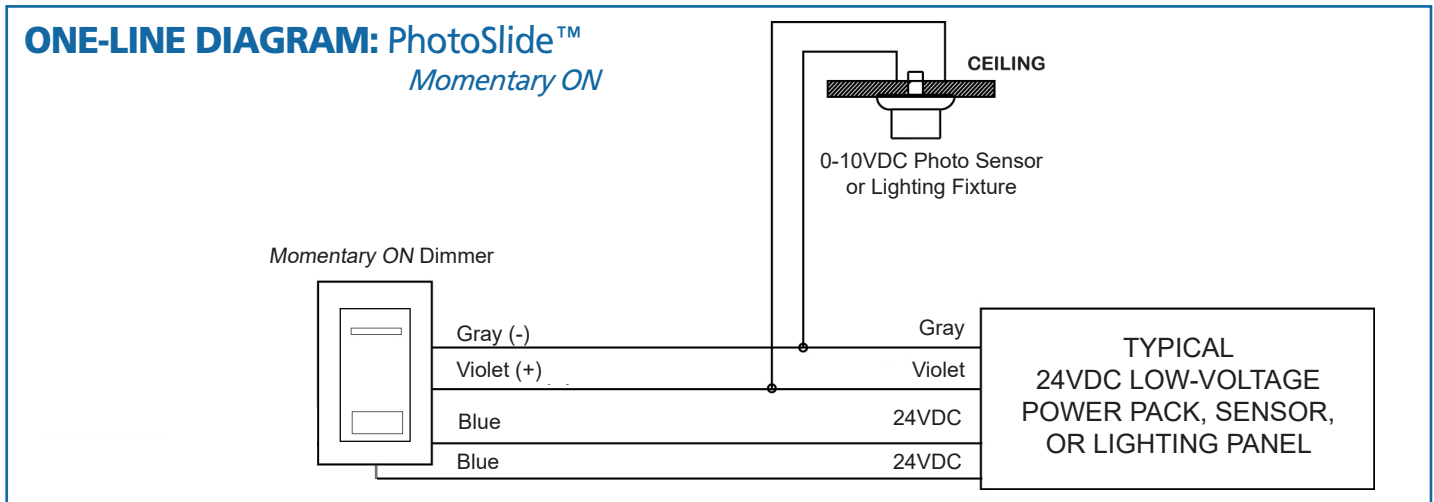

*Exclusive Momentary ON feature of our newest **PhotoSlide™** dimmer provides manual override control of 24VDC low-voltage power packs, sensors and lighting panels with a simple push of the rocker switch. When the lights are active, the separate 0-10VDC slide control provides the occupant with variable light control and the ability to additionally set a maximum light level override.*

TECHNICAL DATA: *Simplicity*[®] PhotoSlide[™] Override Lighting Control for Daylighting Systems

Simplicity[®] Slide Dimmer with *Momentary ON*

<i>Model</i>	<i>PS-LED-010-Momentary ON-xx-24VDC</i> (where "xx" denotes WH or IV)
<i>Switch Rating</i>	24VAC, 20mA
<i>Dimming Input</i>	0-10VDC (from LED control device, driver, or fixture)
<i>Low Output</i>	0VDC
<i>High Output</i>	10VDC
<i>Wiring</i>	
<i>Switch</i>	<i>Blue and Blue: 24VDC low-voltage, momentary ON</i>
<i>Dimmer</i>	<i>Violet and Gray: 0-10VDC sinking voltage</i>
<i>Compliance</i>	<i>NEC Class 2; IECC; ASHRAE 90.1; California Title 24 (2016)</i>

All HUNT products meet ARRA requirements
